

Griffin Arms

We are proud to launch the new version of our GRIFFIN ARMS Systems.

The Noga Griffin Arm is a much stronger and more versatile articulating arm. It is designed to hold lights, small cameras or monitors and any other production accessory that requires an extended articulation mount. It is bigger, longer and outperforms all other three-jointed articulating arms on the market.

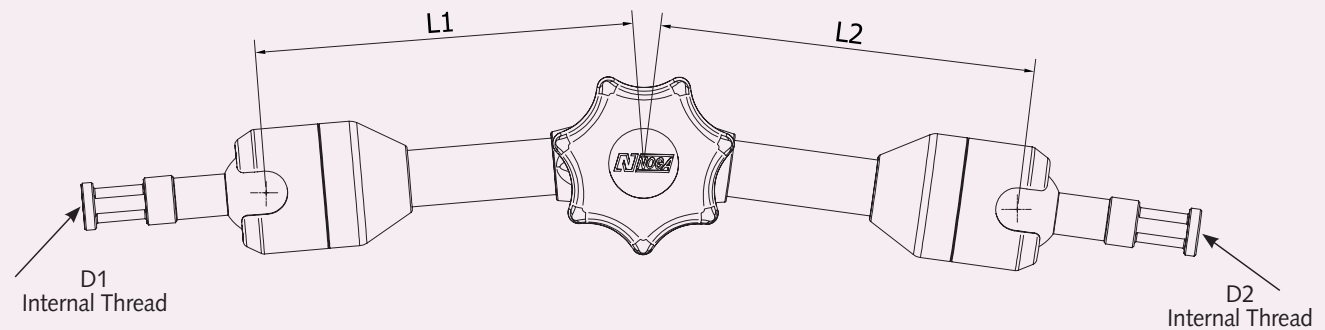

At the heart of the Griffin Arm is the central mechanism that quickly and easily locks or releases the arm's three articulated joints simultaneously with a simple turn. You can get your accessory into the perfect position, and when things change on set - and they almost always do - a fast, simple adjustment of the arm allows you to go with the flow. The rugged Griffin arm also holds more weight than any counterpart, up to 30 lbs (13.63 Kg) at full extension.

The versatile arm can be mounted on a light stand or anywhere else with a grip clamp. Each arm has an industry-standard 5/8 pin threaded at the ends in (1) 1/4" - 20 and (1) 3/8" - 16, respectively, for additional mounting options.

Griffin Arms

- Optimum for Lights, Small Cameras and Small Monitors.
- Central locking knob.
- Variable friction load adjustment.
- Lightweight and rugged construction.
- Durable Noga Quality.

Order No.	Weight		Internal Thread		Arms Length				Max. Load			
	Kg	lbs	D1	D2	L1 mm	L1 inch	L2 mm	L2 inch	L1 + L2 mm	L1 + L2 inch	Kg	lbs
